

M. TAUSEEF SHAH Chairman's Message

I, as a Chairman, Shah Educational Society, congratulate the respectable teachers of the whole world on this auspicious “Teachers’ Day 2006” and I believe that the learned and able teacher are a guarantee of better education of students and this is due to the fact that the lectures delivered by the teachers are so impressionable and universal that completely develop the personality of a student. The attitude of kind and affectionate teachers is helpful in cultivating the desire of acquiring knowledge.

On this glorious day, I want to send a message to all teacher that we must have to develop such institutions in which the creative abilities of students can become more elegant and in future are student proved to be the assets of our country.

On this day, I am bound to say this sorrow that in our beloved country which is created by students, proper attention has not been given to education. Standard of education has been ignored and no able teachers are appointed. Teachers are selected on merit. I just want to say to the concerned authorities that special care should be taken at the time of appointing the teachers because future depend on our teachers and students.

I would like to say in the end that we have to pay our gratitude to our teachers because what we are, is due to them. It is due to their endless and un forgetful efforts and services. Therefore, we are thankful to all our teachers and I just want each and every students to say at least one word to our teacher “THANKS” because in this one word lies all the respect we have for our teacher. This one word is a proof that the efforts of our teachers are fruitful.

“Thank you my Teacher”

M. Tauseef Shah

Chairman Shah Educational Society (Regd)
